1-6. sorularda, cümlede boş bırakılan yerlere uygun düşen sözcük ya da ifadeyi bulunuz.

1. **When questioned by the police, the suspect ---- any knowledge of the crime.**

- A) confirmed B) tortured
C) denied D) reused
E) revealed

2. **The ---- of a gun is an obligation for males in Switzerland as they do a weeks military service every year.**

- A) development B) uncertainty
C) confidence D) possession
E) environment

3. **The employer is in the best position to know which jobs are available or will become available within a ---- period of time.**

- A) disappointing B) competitive
C) brilliant D) reasonable
E) charming

4. **When it became obvious that oil prices would increase ----, most countries rushed to obtain as much oil as they could.**

- A) sensibly B) considerably
C) remarkably D) regularly
E) roughly

5. **It becomes difficult to manage when, where and how you ---- a new idea to the company with the fear that you might be wrong.**

- A) put on B) bring up
C) put off D) carry on
E) hand in

6. **The term mountain chain is sometimes used to designate a long belt of mountains ---- units that may be different in age and structure.**

- A) took in with B) moved on with
C) held up to D) made up of
E) sold up to

7-16. sorularda, cümlede boş bırakılan yerlere uygun düşen sözcük ya da ifadeyi bulunuz.

7. **Generalizations are useful as, with them, you ---- every single thing in a category before you ---- a conclusion.**

- A) don't need to study / can make
B) shouldn't study / make
C) mustn't study / have made
D) needn't have studied / are made
E) wouldn't study / have been making

8. **It ---- quite obvious that the peasants had been encouraged ---- the landowners.**

- A) is / disobeyed
B) would be / being disobeyed
C) has been / to disobeying
D) was / to disobey
E) had been / disobeying

9. The practitioner ---- a degree in health care administration and ---- in a variety of settings over time, including an insurance company, and a medical clinic

- A) has had / is working
- B) has / has worked
- C) will have / is going to work
- D) had / was working
- E) had had / has been working

10. During World War II, the Turkish government was troubled with the insistence of Germany ---- making Turkey a part ---- the war.

- A) at / in
- B) on / of
- C) over / by
- D) with / on
- E) of / as

11. The only part ---- the empire left unconquered ---- foreign countries was northern Anatolia.

- A) on / over
- B) in / in
- C) among / between
- D) from / out of
- E) of / by

12. Many children with learning a behavioural problems are sent to special schools, ---- their individual needs are focused on by who are specially trained.

- A) what
- B) which
- C) where
- D) whom
- E) when

13. According to the law in Turkey, ---- someone is over 40, they can't be elected a president.

- A) as long as
- B) when
- C) however
- D) whether
- E) unless

14. All the staff voted ---- moving to new offices because they thought that the ones they were in at the time looked unprofessional.

- A) in the event of
- B) at once
- C) without doubt
- D) in favour of
- E) on occasions

15. Sinus infection is an acute bacterial illness which causes a sore throat and fever, and can be life-threatening ---- the bacteria release a toxin into the bloodstream.

- A) until
- B) when
- C) by the time
- D) therefore
- E) moreover

16. ---- almost everyone knows what a rock looks like, far fewer people can name its defining characteristics.

- A) Besides
- B) Inasmuch as
- C) However
- D) Whatever
- E) Although

Blood travels from the heart to every organ and tissue in the body (17) ---- an amazing system of blood vessels. The circulatory system (18) ---- other organ systems in its ability to adapt to changing needs imposed on the body by the environment. (19) ---- makes circulation particularly remarkable is the degree to which it is capable of altering its functions and performance. Most other organ systems (20) ---- their functions by 10 or 20 percent; the heart and circulatory system can increase the output of blood by up to 500 percent! (21) ----, the rate that the heart beats or contracts can double or even triple under certain conditions, such as illness or exercise.

17. A) on
C) in
E) with
B) through
D) to
18. A) derives
C) resembles
E) remarks
B) initiates
D) agrees
19. A) whom
C) where
E) why
B) which
D) what
20. A) can change
C) has to change
E) might be changed
B) changed
D) should be changed
21. A) Intimately
C) Highly
E) Exclusively
B) Similarly
D) Unlikely

22-26. sorularda, aşağıdaki parçada numaralanmış yerlere uygun düşen sözcük ya da ifadeyi bulunuz.

Russian is (22) ---- spoken in Russia and, to a lesser extent, the other countries that were once constituent republics of the USSR. (23) ---- 1917, it was the sole official language of the Russian Empire. During the Soviet period, the policy towards the languages of the various other ethnic groups alternated (24) ---- practice. Though each of the constituent republics had its own official language, the unifying role and superior status was reserved for Russian. (25) ---- 1991 corruption, several of the newly independent states have encouraged their native languages, but Russian's, role throughout the region (26) ----.

22. A) familiarly
C) primarily
E) hesitantly
B) distantly
D) dependably
23. A) Even so
C) By the time
E) Until
B) Despite
D) Whilst
24. A) on
C) by
E) for
B) in
D) at
25. A) Following
C) To be following
E) Having followed
B) To follow
D) To have followed
26. A) would continue
C) has continued.
E) were continuing
B) continued
D) had continued

27-36. sorularda, verilen cümleyi uygun şekilde tamamlayan ifadeyi bulunuz.

27. Life expectancy in the Niger Delta averages just 40 years, ----.

- A) none of the problems will be focused by any Nigerian government through out the years
- B) compared to between 53 and 55 within Nigeria as a whole.
- C) as matter of fact life is so difficult in that what the city life offers
- D) none of the residents is planning to stay in any of the villages around the Niger delta
- E) so the insurance companies in Nigeria have found out some new marketing strategies

28. The programme presents different approaches to politics and the effects of capitalism, ----.

- A) for example, access to material systems of circulation is critical to participation
- B) by which the world is enlarging and having new conflicts to deal with
- C) from which neither of the country is about to get rid of in the end
- D) from the viewpoint of the sensitive abstraction of the visual material itself
- E) with a common phrase that often denotes nothing more than the shady deals

29. Just as the enemy troops were getting out of the country, ----.

- A) another big bomb has gone off in the west of the country
- B) they were ordered to remain there for another three months
- C) unless the war starts again in the near future
- D) so that they could return to their homes after a long time
- E) the world will be at peace from now on and it would be kept

30 ---- in which plants and humans and other animals can survive.

- A) The Earth has often been personified as a deity, in particular a goddess
- B) The Earth is the only planet in our solar system whose surface is known to have liquid water
- C) The Earth's oceans may have completely frozen over for 10 to 100 million years
- D) Two humans are presently in orbit around the Earth on board the International Space Station
- E) The Earth's special characteristics make possible the kinds of environments and natural resources

31. Biologists of the 1930s found ways to study viruses, ---- .

- A) knowing that the scientific community was waiting for such a thing
- B) to use highly powerful electron microscopes
- C) yet the cure was still to be found by some of the scientists
- D) though they still could not see them inspite of all trials
- E) besides, many people felt threatened by people with the disease

32. After having been interrogated for hours, ----.

- A) everyone will sigh in relief and accept the congratulations
- B) the police are expected to act on behalf of the government
- C) which exhausted the criminal to a great extent at certain times
- D) the police deciding to put the man under arrest and take to the court
- E) the suspect was found to be guilty for breaking into the premises

33. Until much faster spacecraft can be developed, ----.

- A) Mars could be expected to be the first planet visited by astronauts
- B) the problem has been solved by using batteries
- C) human beings will be restricted to exploring the solar system
- D) which is an important step in the development of spaceflight
- E) it has been powerful enough to overcome the Earth's gravity

34. ---- that modern humans originated in Africa.

- A) According to the most recent researches conducted by some sociologists
- B) Some scientists are still wondering the reality
- C) It has long been claimed by some strictly
- D) Much to the amazement of those involved in the expedition
- E) Not until the documents were made public

35. ---- was indeed first discovered in prehistoric times.

- A) That fire is a beneficial tool for human beings
- B) Even if the knife hadn't been used previously
- C) How people should have dealt with an economic crisis
- D) When people first started to discover the previously unknown places
- E) Whether or not exhaust smog was detrimental for health

36. In countries where there is widespread corruption, ----.

- A) it is normal to pay bribes to police and government officials
- B) many of whom have learnt it from their forefathers
- C) which is a big obstacle in preventing poverty in the Third World
- D) because the political infrastructure is not stable enough
- E) although we have never come across such things

37. - 42. sorularda, verilen İngilizce cümleye anlamca en yakın Türkçe cümleyi, Türkçe cümleye anlamca en yakın İngilizce cümleyi bulunuz.

37. Family and kinship are basic realities in all human societies, whether primitive or advanced.

- A) Genellikle aile ve akrabalık ister ilkel, ister ilerlemiş olsun tüm insan toplumlarının temel gerçeği olmuştur.
- B) Tüm insan toplumlarında temel bir gerçek olan şey, ilkel veya gelişmiş aile ve akraba ilişkileridir.
- C) Aile ve akrabalık ilişkileri tüm insan toplumlarında, ilkel ya da gelişmiş olup olmadıklarına bağlı olmuştur.
- D) Aile ve akrabalık, gerek ilkel gerek ilerlemiş olsun, tüm insan toplumlarının temel gerçeğidir.
- E) Tüm insan toplumlarında aile ve akrabalık kavramları asırlardır ilkel ve medeni tüm toplumlarda bulunmak tadır.

38. Pressure cookers are used to increase temperature above boiling point by confining the steam.

- A) Düdüklü tencerelerin işlevi, buharı hapsederek sıcaklığı kaynama noktası üzerine çıkarmaktır.
- B) Düdüklü tencerelerde, buhar hapsedilerek sıcaklık kaynama noktası üzerine çıkartılır.
- C) Düdüklü tencereler, buharı hapsederek sıcaklığı kaynama noktası üzerine çıkarmak için kullanılır.
- D) Düdüklü tencerelerin kullanımı, buharı hapsedmek ve sıcaklığı kaynama noktası üzerine çıkarmaktır.
- E) Düdüklü tencerelerin kullanılmasıyla, buharın hapsedilmesi ve sıcaklığın kaynama noktası üzerine çıkması sağlanır.

39. With the exception of a few developed countries, the majority of Asian countries have not been able to introduce comprehensive social-welfare programs.

- A) Birkaç gelişmiş ülke dışında, Asya ülkelerinin çoğu, kapsamlı toplumsal refah programları ortaya koyabilmenin yollarını arıyor.
- B) Birkaç gelişmiş ülke dışında, Asya ülkelerinin çoğu, kapsamlı toplumsal refah programları ortaya koyamamıştır.
- C) Asya ülkelerinin neredeyse tamamı, detaylı toplumsal refah programları ortaya koyabilmiştir.
- D) Birkaç gelişmiş ülkeyi saymazsak, Asya ülkelerinin tamamı, kapsamlı toplumsal refah programları ortaya koyabilir.
- E) Birkaç gelişmiş ülkeyi hesaba katmazsak, Asya ülkelerinin tamamı, kapsamlı toplumsal refah programları ortaya koyamazlar.

41. İş arayan fiziksel engelli bir kişiye mani olan engeller onu herkesin çıkarıcı olduğunu düşünen birine çevirebilir.

- A) The hindrances preventing the physically handicapped person from seeking employment may turn him into someone who believes that people aren't interested in themselves.
- B) The physically handicapped person who is seeking employment may be discouraged by a potential employer's attitude.
- C) The hindrances which prevent the mentally handicapped person who is seeking employment may turn him into a cynic.
- D) The obstacles which frustrate the physically handicapped person who is seeking employment may turn him into a cynic.
- E) The hindrances which make seeking employment difficult for the physically handicapped person may turn him into a cynic.

42. Son günlerde sodyumun, ağır yaralanmanın ardından kendini yenileme dürtüsünü harekete geçirmede kilit bir rol oynadığı keşfedilmiştir.

- A) In recent times, sodium has been discovered to also have a crucial part in initiating a regenerative response due to severe injury.
- B) Of late times, it has been determined that it is sodium that initiates a regenerative response once the body has received severe injury.
- C) Sodium has just been discovered to play a vital role in triggering a regenerative response in the body in the aftermath of severe injury.
- D) Sodium has recently been found to play a key role in initiating a regenerative response after severe injury.
- E) Sodium has recently been determined to have a part in igniting a regenerative response to severe injury that has been given to the body.

43-46. soruları aşağıdaki parçaya göre cevaplayınız.

In popular mythology, the ostrich is famous for burying its head in sand as soon as it sees danger. However, the only time you will see this is in a cartoon. The Roman writer, Pliny the Elder, is famous for his descriptions of the ostrich in his 'historia naturalis', where he describes the ostrich and the fact that it hides its head in a bush. However, there have been no recorded observations of this behaviour. Scientists argue that a species that displayed such behaviour would not be likely to survive for very long. The myth may have resulted from the fact that, from a distance, when ostriches feed, they appear to be burying their head in the sand because they deliberately swallow sand and pebbles to help grind up their food. In fact, when threatened, ostriches run away, but they can also seriously injure you with kicks from their powerful legs.

NETyds

NETyds

44. In the passage, it is stated that when ostriches are faced with a threat, ----.

- A) they are unlikely to survive for very long for some unknown reasons
- B) they are known to hide their heads in bushes or sand
- C) they always try to give their attacker a serious injury
- D) they spit out small rocks that they have swallowed
- E) they usually try to avoid it by running, although they can defend themselves

45. We can infer from the information in the passage that ----.

- A) are extremely violent creatures living in the wild
- B) are only ever depicted in cartoons films mainly the ones made in Hollywood
- C) are not very well understood by natural scientists
- D) they prefer to hide from danger, rather than trying to protect themselves
- E) ostriches often cannot digest their food using only their digestive systems

43. The passage makes the point that ----.

- A) all stories about ostriches are completely true and accurate ones
- B) the depiction of an animal is present in most natural history books
- C) the depiction of ostriches hiding their heads may have first been made during Roman times
- D) some make-up stories originally come from the makers of cartoons
- E) is based on eyewitness accounts of them burying their heads in sand

46. What does the writer focus on in the passage?

- A) Indicating that the historic documents found about ostriches are actually fictional
- B) Stating that the fact that we believe about ostriches' burying their heads is only a myth
- C) Informing us about the background of the story of the ostriches
- D) Telling that ostriches do not have sufficient intelligence to act in such a way
- E) Explaining in details that ostriches are actually very violent and confrontational animals

47-50. soruları aşağıdaki parçaya göre cevaplayınız.

Desert is the most prominent feature of the Arabian Peninsula. Although vast arid tracts dominate, there are long stretches of coastline along the Persian Gulf, the Arabian Sea, and the Red Sea, with several major oases in the east. In southwest Arabia, there are coastal mountain ranges from which a high plateau slopes down toward the central regions of the desert to the northeast. The southern area receives greater rainfall than the rest of the region. The differences between coastal and desert life have played their part in Arabian history. Those living on the water have had more contact with other peoples and thus have developed more cosmopolitan outlooks than those living in the interior. Saudi Arabia is the largest country on the Arabian Peninsula. It shares the Persian Gulf and Red Sea coasts with the Persian Gulf states, Yemen, Jordan, and Iraq, so there are cultural and historical overlaps with its neighbors. The Arabian Peninsula comprises the modern countries of Saudi Arabia, Yemen, Oman, the United Arab Emirates, Qatar, Bahrain, and Kuwait.

47. The passage tells us that the northern area ----.

- A) is where most of the oil and the work possibilities are
- B) has less desert than the southern and the costal areas
- C) experiences less rain than the southern area
- D) has no any area that they can produce oil from for creating any economic value
- E) does not include any mountainous areas parallel to the sea

48. According to the passage, ----.

- A) Iraq is part of the Arabian Peninsula
- B) there are no mountains in the Arabian Peninsula
- C) the Arabian Peninsula is entirely a desert
- D) there are only three major oases in the Arabian Desert
- E) the Arabian Peninsula is largely comprised of very dry land

49. It can be inferred from the passage that ----.

- A) all countries on the Arabian Peninsula are quite wealthy
- B) the northern regions of the Arabian Peninsula are not as wet as the southern regions
- C) the desert does not extend to the south of the Arabian Peninsula
- D) unlike other peninsulas, the Arabian Peninsula is surrounded by water on two sides
- E) aside from oases, there are no sources of water in the Arabian Peninsula

50. What can be informed from the passage?

- A) That the mountains of the Arabian Peninsula are near the sea
- B) Mountains of the Arabian Peninsula consist of high plateaus sloping down to the sea
- C) It can be informed that the Arabian Sea is another name for the Persian Gulf
- D) That all of the mountains are in the northern part of the Arabian Peninsula
- E) That the oases are all in the south of the Arabian Peninsula

51-54. soruları aşağıdaki parçaya göre cevaplayınız.

Hearing aids are not perfect. They will not restore or fix hearing loss. As their name implies, they help make sounds accessible to those who have hearing loss. There are two types of hearing loss that cannot be assisted by hearing aids. One happens when the auditory cortex of the brain does not receive input or stimulation due to hearing loss. This part of the brain may start to lose cells, and the ability to process sound. This is most common with more severe hearing losses, and cannot be reversed with hearing aids. Although this cell loss is worse in severe hearing loss, it is seen in all amounts of hearing loss and is caused by sensory deprivation. Damage to the hair cells of the inner ear result in sensorineural hearing loss. When these hair cells are damaged, a person loses some ability to discriminate between different frequencies. This will likely cause decreased ability to understand speech. In this case, amplifying speech (as a hearing aid does) does not always improve speech understanding.

51. The passage implies that lack of stimulation of the brain ----.

- A) due to hearing problems might cause cells to die
- B) very rarely causes the loss of the ability to process sound
- C) may make it difficult to know where a sound is coming from
- D) may create problems with hearing different frequencies
- E) damages hair cells in the great majority of deaf people

52. One important point made about hearing aids is that ----.

- A) they do not help deaf people communicate in noisy environments
- B) they usually only help people who have severe hearing loss
- C) most of them only help people who have recently gone deaf
- D) they are not able to replace sound processing properties of brain cells
- E) multiple follow-up visits are common, particularly for new hearing aid users

53. This article clearly points out that hearing aids ----.

- A) can replace the ability of certain neurons to process sounds
- B) generally do not help a person discriminate between sounds
- C) take time to get used to because the brain must readjust
- D) can selectively amplify the frequencies a person needs to hear
- E) may be too weak or too powerful and require adjustment

54. It is claimed in the passage that ----.

- A) the patient's problem is restored after months of hearing aid use
- B) the hearing loss is almost always due to the loud noises
- C) some the severe hearing losses are reversible with medical treatment
- D) the side effect of hearing loss can be restored by stimulating the brain cells
- E) hearing loss is always associated with some degree of cell loss

55-58. soruları aşağıdaki parçaya göre cevaplayınız.

Over the past two decades, global vegetation has been affected by the increases in carbon dioxide by taking in more carbon dioxide and storing the fixed carbon in biomass or soil than it is releasing by respiration and decomposition. Why is this? Over the same period, air temperatures over the land have increased, resulting in a lengthened growing season in the northern and mid-latitudes. In fact, it seems that the northern spring now arrives approximately a week earlier than it did 20 years ago. Therefore, a gradual and slight warming seems to have favored photosynthesis over respiration-decomposition with far-reaching effects on the global carbon balance, as approximately one-quarter of our industrially-emitted carbon dioxide is now being fixed and stored by the vegetation. If this trend continues, the severity and onset of global warming might be delayed as increasing amounts of carbon dioxide are removed from the atmosphere and stored. However, some scientists warn that in the future, the biosphere could flip from being a net carbon sink to a net carbon source over the next century.

NETyds

NETyds

55. We can assume from the passage that ----.

- A) 25 % of carbon dioxide occurring in the biosphere is released by industrial factories
- B) global vegetation has led to a drastic rise in the amount of carbon dioxide in the biosphere
- C) some parts of the world used to be a little colder that they are now
- D) plants normally take in more carbon dioxide than they absorb
- E) some scientists are hopeful that excessive amounts of carbon dioxide will be reduced

56. We can assume from the passage that carbon dioxide ----.

- A) is not absorbed by plants and kept in the atmosphere
- B) is poisonous in high amounts and can be harmful for plants as well
- C) might eventually cause global warming and so some additional side effects
- D) is well known to be the main product of photosynthesis
- E) has caused the global temperature to rise by 20 percent

57. One of the fears a group of scientists have for the future is that ----.

- A) photosynthesis will cease to occur someday in the future
- B) air temperatures over the seas and oceans will increase very dramatically
- C) the winter season may also grow in length due to excessive amounts of carbon dioxide in the biosphere
- D) vegetation will no longer store as much carbon dioxide as it should
- E) the biosphere could release carbon dioxide rather than remove it

58. What can be the best title for the passage?

- A) Changing Global Land Surface
- B) Removing The Gases From The World
- C) Seasons To Arrive Later And Passing Earlier
- D) Respiration And Its Disappearance From The Earth
- E) Decomposition And Respiration In The Atmosphere

59-62. soruları aşağıdaki parçaya göre yanıtlayınız.

For the first century following the Roman conquest, Egypt functioned in the Mediterranean world as an active and prosperous Roman province. The value of Egypt to the Romans was considerable, as revenues from the country were almost equal to those from Gaul and more than twelve times those from Judea. Its wealth was largely agricultural: Egyptian grain supplied the city of Rome. The country also produced papyrus, glass, and various finely crafted minor arts that were exported to the rest of the Roman empire. Its deserts yielded a variety of minerals, ores, and fine stones such as porphyry and granite, which were brought to Rome to be used for sculpture. and architectural elements. Trade with central Africa, the Arabian Peninsula, and India flourished along the Nile, desert routes, and sea routes from the Red Sea port of Berenike.

NETyds

NETyds

59. It is clear from the passage that ----.

- A) Egypt was once conquered by the Romans
- B) Egypt was known to be 12 times as large as Judea
- C) Judea and Gaul were the two richest Roman provinces
- D) the province of Egypt dominated the Mediterranean
- E) Egypt was the favorite holiday resort of the Romans

60. We learn from the passage that ----.

- A) most of the raw materials in Rome came from Egypt
- B) Egypt paid a higher tax to Rome than Gaul did
- C) most of what Egypt gave to Rome came from plants
- D) Egyptian art suffered under Roman dominion and the rulers
- E) Egypt became poor under the yoke of the Romans

61. According to the passage, ----.

- A) including granite some other materials were quarried along the banks of the Nile
- B) was made into finely crafted wares which were exported
- C) granite as well as ores were taken from the Egyptian desert
- D) granite was not used to make sculpture in Egypt
- E) its products and granite was the largest Egyptian export to Rome

62. We can understand from the passage that as well as Egypt ----.

- A) people in Judea also hated the Romans
- B) Gaul also bought in fantastic amounts of money for Rome
- C) the city of Rome also produced lots of grain
- D) Gaul produced the same amount as revenue as Judea
- E) Judea was jointly the most important province of ancient Rome.

63-67. sorularda, karşılıklı konuşmanın boş bırakılan kısmını tamamlayabilecek ifadeyi bulunuz.

63. Jason :

- Have you read anything about alternative fuels?

Tina :

- I read somewhere that wind power is a great source of energy.

Jason :

- ----

Tina :

- That's why people are excited about this alternative fuel.

- A)** I don't really know that much about it and not so much interested.
B) Have you any idea what people think about these fuels?
C) And of course it's very clean and renewable.
D) Is there any chance of them replacing petrol with any alternatives?
E) Is it considered to be an alternative fuel or just another type with a different name?

64. Pete:

- I don't understand what this newspaper is on about when it mentions a new version of android.

Bill:

- Android is meant to be the new stage of the Smart phone.

Pete:

- ----

Bill:

- No it just refers to new applications that make the mobile phones more useful.

- A)** I don't actually use it that much for work as it is too complicated.
B) Do you ever use phone to get in touch with your friends?
C) We should be more careful on the Internet.
D) So is it different to the normal mobile phone with no internet connection?
E) That's interesting. What does it involve except for that?

65. Norma J. :

- Was Robert a patient of yours, Dr. Bailey?

Dr. Bailey :

- He lost all memories of the past; he couldn't remember people he'd just met.

Norma J. :

- ----

Dr. Bailey :

- Yes, it is, and it came as a great surprise when his memory for music was shown not to have decayed.

- A)** Would he forget people's faces as well as their names?
B) He was an expert in Soul and Rock music, isn't that right?
C) How did you become interested in him? Was it difficult?
D) So, he lost things within a few seconds, didn't he?
E) How did you start getting involved in the music and medical illness program?

66. Tim :

- It must have been hard for civilians in Britain during the Second World War.

Annie :

- I think rationing must have been difficult for families.

Tim :

- ----

Annie :

- That must have been awful.

- A)** It must have been a relief when it all ended.
B) People still came together though to talk about those days.
C) But there was also a big community spirit that helped the country.
D) Yes, even kids' sweets had to be rationed for a long time.
E) I don't think it would have been that bad, though.

67. William :

- What does "absolute zero" mean?

Stephen:

- "Absolute Zero" is the coldest it can possible get.

William :

- ----

Stephen :

- I think that it's about minus two hundred and seventy three degree centigrade.

- A)** I though that it was a drink. A beverage with alcohol.
- B)** What did you study at university? Was it Chemistry?
- C)** Do you think it is very cold outside today? I can't stad for it
- D)** And at which temperature does that occur? Ant idea?
- E)** And what is the use of this information about temperature?

68.- 71. sorularda, verilen cümleye anlamca en yakın olan seçeneği bulunuz.

68. Though Rome has many fountains, the most famous of them all is the Fountain of the Four Rivers, constructed by Bernini.

- A)** The Fountain of the Four Rivers, which is the most famous of all the fountains built by Bernini, is one of Rome's many fountains.
- B).** The Fountain of Four Rivers, which was built by Bernini, is the most famous of all the fountains in Rome.
- C)** The most famous fountains of Rome, many of which were built by Bernini, include the Fountain of the Four Rivers.
- D)** Bernini, who built the famous Fountain of Four Rivers, built many of the most famous fountains of Rome.
- E)** One of the most famous fountains of Rome is the Fountain of the Four Rivers built by Bernini.

69. To stop the illegal use of drugs to enhance performance, Olympic athletes are forced to submit urine samples.

- A)** Had the Olympic athletes not been suspected of using controlled substances, the they wouldn't have been required to give urine samples.
- B)** Athletes who are suspected of using banned substances to improve performance are required to submit urine tests.
- C)** In order to prevent them from using drugs to improve performance, which is not allowed, Olympic athletes have to submit urine tests.
- D)** If an athlete is asked for a urine test at the Olympics it is probably because he has been suspected of using illegal substances.
- E)** Because using illegal drugs is not allowed in the Olympics, athletes should submit urine tests.

70. Everyone but the headmaster thinks that the students should go to the theatre tonight.

- A)** It is only the headmaster that doesn't like the idea of the students' going to the theatre tonight.
- B)** Very few people agree with the manager that the students shouldn't go to the theatre tonight.
- C)** The manager said that the students can't all go to the theatre tonight.
- D)** The manager seldom wants to go to the same places as the students.
- E)** The manager doesn't like the theatre and so won't be joining the students tonight.

71. The fact that their lives have been extended is down to help of the life support system.

- A)** That their lives have been prolonged with the help of the life support system is a fact.
- B)** Their lives have been prolonged with the help of the life support system.
- C)** Through the efforts of the life support organisation, many lives have been saved so far.
- D)** It was mostly through the life support organisation that so many people were able to be accommodated in a safe place.
- E)** Had it not been for the extension of their lives through the life support system, most of those people would have died by now.

72. - 75. sorularda, boş bırakılan yere, parçada anlam bütünlüğünü sağlamak için getirilebilecek cümleyi bulunuz.

72. The positive teachers are by far the most agreeable teachers. A positive teacher is one who seems interested in his subject and his students. ----. This kind of teacher allows for questions and discussions in class and does not seem to mind if a student disagrees with him. A positive teacher shows his interest out of class as well.

- A) Some professors do not mind if a student does not agree with them
- B) Most professors do not allow the students to ask question in class
- C) The first thing a positive teacher does is try to learn all of the students' names
- D) Students do not feel comfortable in the presence of some teachers
- E) Some teachers show negative attitudes towards students

73. ----. The most obvious effect of drought is crop failure. In less-developed nations--where local agriculture is barely enough to feed the population- drought-caused crop failure may result in the deaths of many people from starvation and malnutrition. In any area stricken by drought, the possibility of forest fires and grass fires is greatly increased; soils dry out and may be blown away by winds; and animals may die of thirst.

- A) A much shorter drought happened in the summer of 1980 in the United States
- B) Careful conservation of the water supply is perhaps the best way that people can prepare for the possibility of drought
- C) A drought is a condition of significantly below-normal water levels in the ground, lakes, reservoirs, and rivers.
- D) An example of a long drought occurred in the Sahel region of north central Africa
- E) What people consider a drought can change depending on how people use water

74. People who study eyesight loss have established guidelines for identifying blindness and visual impairment. ----. A person is said to be visually impaired if he or she has a visual acuity of 20/70 or less when wearing corrective lenses. This means that what a person with normal vision can see at 70 feet away, a visually impaired person can see only at 20 feet away.

- A) Blind teenagers and adults can learn to use a guide dog to move about
- B) Diabetes causes a swelling and leaking of the blood vessels inside the eye
- C) The first school for children who were blind was founded in France in 1784 by Valentin Hauy
- D) The guidelines are based on visual acuity, which means the amount of details an individual can see
- E) A person is considered to be blind if his or her visual acuity is 20/200 or less with corrective lenses

75. A recent report in the journal, *Chest* of a study done at Johns Hopkins School of Medicine in Baltimore suggests that people with asthma may be more likely to have symptoms of depression than the non-asthma population. ----. And that can lead to a worsening of asthma symptoms and even asthma attacks.

- A) If you think you might be suffering from it, talk with your doctor
- B) It's one more way of taking control of your asthma
- C) Further, when you are depressed, you may be less likely to follow your asthma care plan
- D) So, my advice is to get your shot as soon as you can
- E) That could trigger asthma symptoms or even an asthma attack

76-80. sorularda, cümleler sırasıyla okunduğunda parçanın anlam bütünlüğünü bozan cümleyi bulunuz.

76.(I) The automobile underwent many changes in the 1970s, 1980s, and early 1990s. (II) Concern with safety and pollution led to design changes and the introduction of new technology. (III) Automobile bodies and engines were made smaller and lighter to save gasoline. (IV) Millions of people driving passenger cars create huge traffic jams around major cities. (V) Moreover, researchers worked on alternatives to the gasoline engine and on fuel-efficient transportation.

A) I B) II C) III D) IV E) V

77. (I) Astronomy is different from most sciences in that researchers cannot directly interact with the objects they study. (II) It was under the clear, dark skies of the Middle East that the first true astronomers began their work about 6,000 years ago. (III) Except for an occasional Moon rock or meteorite, all celestial bodies are completely out of reach. (IV) In other words, astronomers cannot dissect, weigh, touch, or smell celestial bodies. (V) The only way scientists can learn about them is by observing the light they emit or reflect and by monitoring their positions and movements.

A) I B) II C) III D) IV E) V

78. (I) When you make a mistake at work, which everyone inevitably does at some point, face up to it. (II) Reasonable bosses know that a sick employee is not productive. (III) Don't ignore your error or place the blame on others. (IV) Take responsibility and come up with a solution to fix your mistake. (V) Your boss may not be too happy about it, but she will at least be impressed with your response.

A) I B) II C) III D) IV E) V

79. (I) Allergies are responses caused by the immune system to a particular food, inhalant or chemical. (II) Although many sensitivities are not true allergies, in popular terminology, they are often used to mean the same thing. (III) The term "sensitivity" is general and may include true allergies. (IV) It also includes reactions for which the cause has yet to be determined. (V) For this reason, you should stay away from the food that will cause you to gain weight.

A) I B) II C) III D) IV E) V

80.(I) There are many theories about what the origin of playing cards is. (II) On the contrary, Gypsies used them for purposes of fortune telling. (III) It is thought by some that they were discovered in India, from where the cards are supposed to have made their way into Europe by means of the Gypsies. (IV) Others have regarded Egypt as their source, noting the probable Hieroglyphic figures. (V) China is also mentioned as a probable origin as playing cards were known in China by the year 1120 AD.

A) I B) II C) III D) IV E) V
